

Bevi & Go

Barista Manual

Everything you need from clock-in to end of shift.

© 2026 Bevi & Go

1. Clock in

Open **Payroll** → **Timeclock** at the start of your shift and tap **Clock in**. Clock out at the end so your hours are counted correctly.

2. Taking an order at the POS

Open **Sales** → **POS**. Tap a category, then tap a drink to add it to the cart.

If the drink has options (size, milk, sugar, add-ons), the customize sheet opens. Pick the options and tap **Add**.

Use **Search** to find a drink fast. Tap **Bundles** for current combo deals.

Optional: type the customer's name, or tap **Scan** to read their QR and attach loyalty points automatically.

When done, tap **Checkout**.

3. Payment

Choose the payment method. For **cash**, type the actual bill the customer hands you in the **Cash Bill** field — the screen shows the change owed.

For card / GCash / transfer, the amount auto-fills to the remaining balance.

Need to split? Tap **+ Add payment** and divide the total across methods.

Tap **Complete order**. The receipt and any drink labels print automatically. Each label includes a unique inspirational quote — read it out, customers love it.

4. Holding & recalling orders

Tap **Held** to park a ticket (customer stepped away, large group still deciding). Tap **Today** to see every order made today and reprint a receipt or labels.

5. Customers who self-ordered (QR)

If a customer placed the order from their phone, it shows in **Today** as *unpaid*. They will show you an Order # like #012. Open the order, accept cash, and tap **Complete**. Labels print automatically.

6. Fixing mistakes

Before payment: tap the item in the cart to change quantity or remove. After payment: only an admin can **Void** or **Refund** the order — call them.

7. End of shift

Open **Sales** → **End of Shift**. Count the cash drawer, type the total, and submit. Hand the printed summary and cash to the admin/owner.

8. Common questions

- **Printer didn't print** — try Today → Reprint. If still nothing, check the cable and paper.
- **Customer's QR doesn't work** — tell an admin to re-issue their loyalty card.
- **I can't see a drink** — it may be marked inactive in the menu; tell an admin.
- **Wrong price** — never edit prices on the fly. Apply a manual discount at checkout or call an admin.
